About PPG

With headquarters in Pittsburgh, USA, we are present in over 70 countries delivering innovative solutions to our customers. We supply customers in the construction industry, the consumer goods sector, the general industrial and transport segment as well as the packaging industry.

We at PPG enhance and improve the world by working every day on the development of paints, varnishes and materials, which have been enjoying the trust of our customers for over 130 years now. We solve even the biggest challenges with dedication and creativity in close cooperation with our customers.

Our coatings fulfil not only an aesthetic but also a functional purpose. The fact that two of three vehicles produced in Europe and North America use the technology and know-how of PPG is proof how widespread our products and services are.

PPG coatings and special materials help our customers to protect, improve and beautify places not only those we call home. The product range of PPG coatings is wide and diverse – covering small and large, every day and unique items. We provide paint for almost everything from vehicles, aircrafts, wind turbine blades, vessels, drinking water tanks to family homes and office buildings.

Get inspired with our unique colours

Colour is emotion and can speak to the human soul in many different ways. We know that it is an outward sign of your taste, mood and passion. Therefore, choosing the right colour is crucial when creating a home that expresses your vision and personality. With thousands shades to choose from and variety of finishes from matt and silk to high gloss, our colours will help you to achieve the home of your dreams. Our emulsion paint collection is fully coordinated and compatible with the rest of the products like enamels and woodstains. This allows you countless color combinations to create unusual things: combine the creative concept of architects, designers or professional painters with a harmonious composition of the building in its natural surroundings.

The PPG CHROMATIC colour chart provides an overview of 1170 available colours.

CHROMATIC is the selection from most widely used shades in the market to those reflecting future trends. Chromatic System technology ensures best opacity, accurate colours, perfect reproducibility, unsurpassed durability and endless colour offer.

- A unique color fandeck for all PPG brands and all channels.
- A differentiated colour range: inspirational, trendy, unique, recognizable and evolving.
- A colour brand for both, professionals and consumers.

The PPG CHROMATIC and CHROMATIC FACADE

Fandecks are essential professional tools for the colour consultation and for the design of every task. The tinting system offers to select the colour also from other colour charts like classics from RAL, NCS and others. This makes the selection of the right colour easy and safe.

We listen, we learn and we work on quality products and services together with you, thus helping you to get the best. Whether you have a technical question, need colour or material advice, assistance on a building site or require information about sustainable care - our trade partners and our professional consultants are available locally every day.

When colour becomes a precise science...

When it comes to color technology, you are in the best hands with PPG. Trust the competence and many years of experience of PPG and its brands in the field of professional tinting and the comprehensive know-how in the color technology.

PPG Tinting System is the reference for professional, precise and efficient tinting.

- Highest color accuracy over the entire product range
- Huge variety of colors
- Brilliant color shades with high light resistance
- Easy to reproduce
- Professional color fans for the highest demands
(color tone determination, light resistance data, light reference values)

When painting interior...

At first glance, it seems that you cannot spoil too much when painting yourself and easily save some money demanded by a professional. However, when buying the material be sure what you can manage yourself and what not. In particular, the selection of shades and choice of suitable paint requires painting experience. Consultation with an expert is worthed in this regard, because the choice of paint is an alpha and the omega of successful painting.

Some paints are sold at very affordable prices, have great parameters and are suitable for less experienced painters, however, when purchasing paint products, the cheapest solution does not always pay off because it might not bring the expected effect and will need to be repaired or repeated. The choice of shade is up to you, but always try the quality of the paint. This is the only one that guarantees that the result will be 100% and you will not have to paint again next year.

We recommend washable paints with the so-called Wet Abrasion Resistance. If the walls are very often marked with fingertips or splashes, you can easily remove the dirt using a sponge and water with a detergent and you will not get any damage. If you have children or pets, you will appreciate the benefits of washable walls every day. The washable paints will last longer and you do not have to scratch or penetrate the walls when you paint next time. You save both time and money.

What is good to know when choosing the paint?

- Not every colour is suitable for each substrate and use.
- Paint varies also in abrasion resistance and washability.
- Some materials create shiny surfaces and others matt.
- Each paint has a different coverage.
- Mixing the same shade yourself for subsequent repair is not easy. Use PPG Color Center just to be safe.
- Calculation and consumption plan are important issues. It saves costs.
- Consider the condition of the surface you are going to paint and what kind of room.

White or coloured?

Pastel shades, colour combinations, stripes and other shapes or special techniques are enjoying a growing popularity, but many prefer the purity and simplicity of the white painting.

Some people say white is not a real colour. However, white gives interior a friendly and clean atmosphere. It works well on wall with different structured surface, resulting in light and spacious interior. Moreover, it matches perfectly with furniture and accessories of natural materials such as wood. Walls occupy large areas, so you should have their colour chosen with care and respect to all other family members, their tastes, lifestyle and personal needs. **Warm colours work optimistically:** The light shades optically lighten and expand space. **Dark shades** narrow the room, reduce but also clearly define its purpose.

Cold colours feel cool: They create the impression of purity, freshness, calmness and are usually used in bedrooms and offices. Their bright shades optically expand the space; however, darker shades should be used only in large and sunny rooms.

We use over 50 years of experience in the development and production of interior and exterior wall paints.

A consistently high level of product quality is guaranteed by the use of nanotechnologies and is ensured also by daily monitoring of selected parameters. This gives us the confidence that we will not lose the trust of our customers.

Interior wall paints

Using colour has the most transformative effect for your home.

Interior wall paints

Thinking of color; We 've got it.

HERA White

Description: Very high spreading rate and coverage coating offering an attractive finish.

Properties: Suitable for common operations on all interior building surfaces such as plaster, plasterboard, spatula coated masonry, laminated chipboard and more. Condensate permeable; easy to apply; offers excellent whiteness

Thinning: With water up to 5%

Spreading rate: 12m2 per coating

Trilak Today

Trilak, a company which was founded in 1907 and is based in Budapest, is one of the leading paint producers in Europe. On the basis of its tradition in the paint industry, the company is consolidating its leading position in the market by providing high quality products which are accessible to everyone and are environmentally friendly and consumer friendly. Since 1988 Trilak is member of PPG Industries.

PPG Group

PPG: We protect and beautify the world®
PPG Industries' vision is the world's leading coatings company by delivering high quality, innovative and sustainable solutions in a consistent way in which customers trust in the protection and enhancement of their products and environment.

optimal

Universally usable on all common surfaces such as e.g. plasters, concrete, gypsum, woodchip wallpaper, plasterboards, gypsum plasterboards and the like.

Thick and creamy emulsion paint for high quality and durable new and renovation coats on all standard walls and ceilings in interior. Due to VOC-free formulation with low emission allows the coating to "breathe". Exceptional vapor permeability and scrub resistance is an ideal match to meet the requirements in average traffic environment. Provides luxurious white matt finish, suitable for private living areas as well as premises.

Did you know?

Snow-white paints increase the intensity of lighting. Thanks to them, we get the feeling that there is more light in the room.

exclusive

Universally usable on all common surfaces such as e.g. plasters, concrete, gypsum, woodchip wallpaper, plasterboards, gypsum plasterboards and the like.

Premium smooth and creamy interior emulsion paint with excellent opacity and cleanability. Hygienic room air due to solvent and plasticizer-free formulation. Especially suitable for coating walls and ceilings that are exposed to high traffic such as waiting rooms, care homes for elderly, schools, nurseries etc., but also kitchens, halls, children and living rooms. Rich palette of colour shades, exclusive durable matt finish and superb application properties make this paint a popular choice for more demanding customers.

Did you know?

If you think about colour transformation because the white walls began to be boring, you should know that the chosen colors will affect well-being of the whole household. Colours can not only visually enlarge or reduce space, lower ceiling, narrow down or expand walls, but also affect your mood. Some tones soothe, others make us nervous and others can create a feeling of cold or heat.

- High whiteness.
- Excellent opacity.
- Easy application – no roller or brush marks.
- Great dry scrub resistance.
- Durable and diffusible.

- Excellent coverage and wide colour offer.
- Robust and washable surface.
- Very easy to clean.
- Highly water vapor permeable.
- Easy to apply.

facade

Designed for outdoor use especially on all sound mineral substrates and plasters (cement, concrete, limecement) and intact dispersion coatings, gypsum substrates in interior, etc.

Acrylate based exterior emulsion paint with ultimate long-term weather protection and moisture regulating properties for smooth masonry. For high quality and highly diffusible facade coatings where preservation of the surface texture is required. Easy to apply providing a uniform matt finish and ensures stable colours for a long time. The smooth character of the coating surface also highlights the visual appearance of the architecture.

Did you know?

When it comes to choosing the colours for the façade of your home, it is important to think about tones that are easy to manage (simple to clean) and that tie in with the look of the rest of your home and that create an interesting and aesthetically stylish look.

facade elastic

Primalex Facade Elastic is a special renovation, water-based and acrylic resin based paint formulated for exterior use. High content of micro fibre reinforcement ensures to fill non-dynamic cracks up to 0,5 mm. Silicon additive secures a low-soiling film and protection against algae, mould and dirt. It provides water-repellent, matt finish with excellent resistance to adverse weather conditions while keeping good surface breathability.

For outdoor use especially for the renovation of all types of old facades and possibly also for interior plaster (mineral, acrylic, silicone and silicate including insulation systems). Ideal for decorative treatment of solid, variously modified grain or embossed façade surfaces.

- High coverage and wide colour offer.
- Weather resistant.
- Long-term protection and high durability.
- Highly water vapor permeable.
- Excellent adhesion.

Usage

exterior in 1 layer drying time

- Silicon additive for long-term weather resistance
- Elastic fibre reinforced
- Perfectly bridging cracks
- High coverage and wide colour offer
- Excellent protection and high durability

primer

Ideal for all types of coating, highly or unevenly absorbing surfaces. Particularly suitable for non-primed walls and ceilings, gypsum boards, mineral plasters (quality min.vH10), firmly adhering or slightly weathered old coatings, plasterboards, concrete surfaces, etc.

Universal primer concentrate for interior and exterior use. Reduces the absorption capacity of walls and ceilings providing the perfect base for paint application. Insures great adhesion of subsequent layers of paint, durability and uniformity of light or intensive colours overall surface.

Excellent balancing and reduction of absorbency.

Consolidation of the porous surfaces.

High spreading rate and concentration.

Environmentally friendly.

Quick drying.

The PRIMALEX primer has a strong hygroscopic property - absorbing the moisture from the air surroundings and thus is being able to compensate the hygroscopic capacity of dusting, mineral and other carrier surfaces.
